Project Name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

## Create HTML Pages

We use HTML to create the front-end part of the web page.

- Here, we have created 3 HTML pages- home.html, image.html, imageprediction.html, and 0.html.
- home.html displays the home page.
- image.html is used for uploading the image
- imageprediction.html will showcase the output
- 0.html is to showcase the result. It tells the action to be performed on imageprediction.html while showcasing the result.

For more information regarding HTML <https://www.w3schools.com/html/>

- We also use JavaScript-main.js and CSS-main.css to enhance our functionality and view of HTML pages.
- o Link :[CSS](#) , [JS](#)

Home.html looks like this

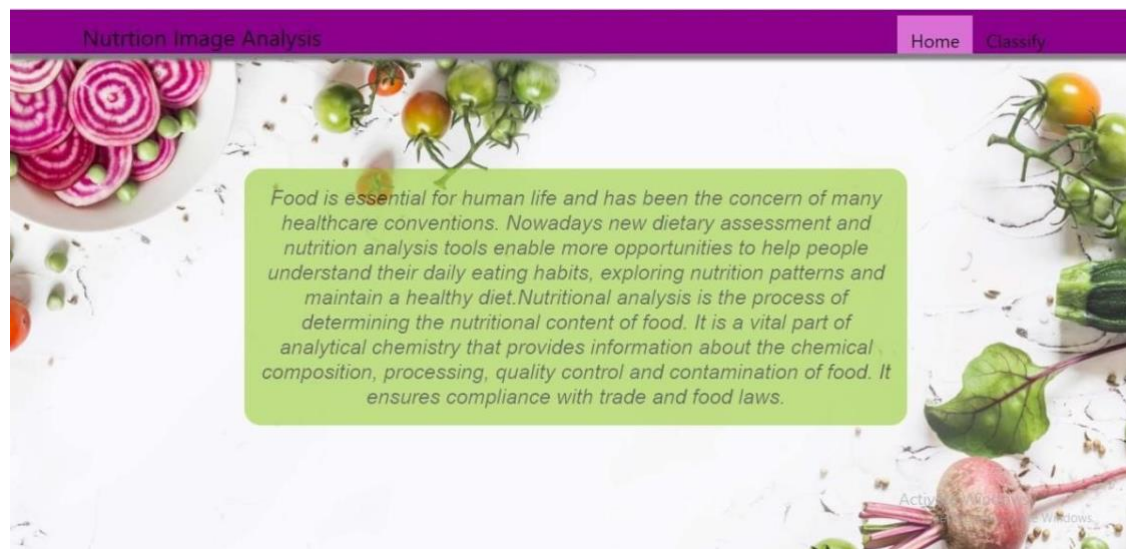

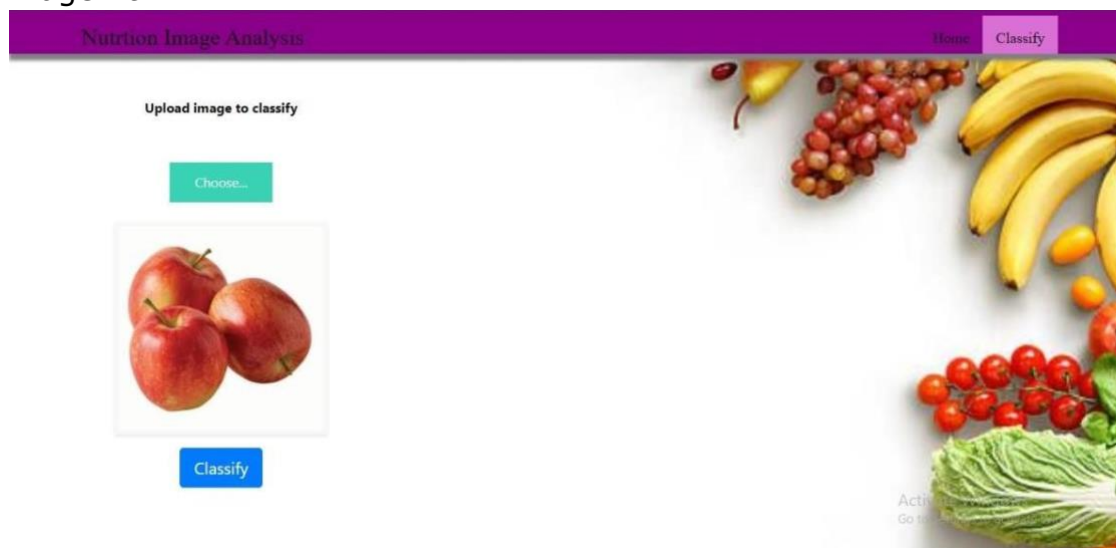

image.html
